

リョクユウ
「淡い緑釉」壺

浅見 薫

倉敷芸術科学大学芸術学部

(1995年9月30日 受理)

解 説

サイズ：φ18.8cm×H23.0cm

素 材：磁器質胎土，石灰バリウム系艶消し釉薬，発色剤：鉄化合物

焼 成：都市ガス窯，還元焰焼成

23時間30分焼成，最高温度1250℃

梅雨も過ぎて草木に新しい営みが芽生え始める頃，花のあとにふっくらとした可愛い実が息づいていた

美しい淡い緑色の塊は，日一日内から溢れる力で大きくなっていった
自然の営みとは云え，誠に逞しさを内に秘めた塊である

若い美しい直向きな息吹に人生を見つめなおしたい願いがする

Green Nutlet

(Received September 30, 1995)

Size : $\phi 18.8\text{cm} \times \text{H}23.0\text{cm}$

Materials : Clay of Porcelain, Matt glaze of Calcium Barium, Color former
Ferrous

Baking : Gas kiln, Reduction flame baking, Baking time of 23 hours and
30 minutes, Highest temperature of 1250°C

In the season when grass and trees have started to grow up as the new working of nature after the rainy season, puffy little nutlets appear after the blooming of flowers.

A lump that is a beautiful light green color, growing larger and stronger day by day, is one of the tiny wonders of nature. However this lump contains a real sturdiness inside.

I feel like reflecting on my life again, as I observe this young, beautiful and earnest work of nature.
